
Sec. 3-2.3 Rural residential district (RR).

(a) *Purpose.* The rural residential (RR) district establishes appropriate areas and land use regulations for low density residential uses and compatible non-residential uses characteristic of rural land development. The primary intent of the district is to provide for residential development at greater density than the agricultural district on soils least valuable for agricultural production, but continue to support small-scale farming on more productive district lands. The absence of urban and suburban infrastructure is intentional. Residential uses within the RR district are largely self-sustaining and generally limited to detached single-family dwellings on large lots, consistent with rural land use and limited infrastructure. Clustering of smaller residential lots may occur where needed to protect prime farmland from non-agricultural use. The district allows public facilities and services necessary for the basic health, safety, and welfare of a rural population, and other non-residential uses that are compatible with agricultural community character.

(b) *Permitted uses.* Permitted uses within the RR district are limited to the following:

(1) *Residential.*

- a. Manufactured (mobile) homes, excluding new or expanded manufactured home parks or subdivisions.
- b. Single-family dwellings (other than manufactured homes), detached only, on lots four acres or larger, or on lots a minimum of one acre if clustered to avoid prime farmland.

 - (5) *Lot width.* For a new lot with a majority of its frontage along the outside of a street right-of-way curve whose radius is 100 feet or less, the minimum lot width at the right-of-way is 40 feet. The minimum width for all other new lots is 100 feet at the right-of way.
 - (6) *Lot coverage.* Minimum pervious lot coverage of 30 percent (70 percent maximum semi-impervious and impervious cover) for all uses.

-
- (f) *Rezoning to RR.* Rural residential zoning may be established only within the agriculture residential (AR) and rural community (RC) future land use categories. The district is suitable for rural areas not used to support large farming operations due to economic viability, soil productivity, surrounding development, or similar constraints. The district is appropriate to provide transitions between areas zoned or used for agriculture, conservation, or outdoor recreation and areas zoned or used for rural mixed-use or low density residential.
