Notation:

MCL = Maximum Contaminant Level, maximum permissible level of a contaminant in water established by EPA; Federal Action Levels are 0.015 mg/L for Lead and 1.3 mg/L for Copper. Sodium has a recommended limit of 20 mg/L. A blank MCL value indicates a level is not currently established.

QL = Quantitation Limit is the lower calibration concentration.

ND = Not detected above the listed specified reporting limit (QL).

CAS Number = Chemical Abstract Service Number is an unique identifier of the chemical tested.

[^] = 'PASS', indicates that the parameter tested meets EPA, State, or local jurisdiction MCL. 'Exceeds' indicates EPA secondary limit (Aesthetic) was exceeded. 'Fail' indicates EPA Primary limit (Health) was exceeded.

An * in front of the parameter name indicates it is not NELAP accredited but it is accredited through OR DEQ or USEPA Region 10.

These test results meet all the requirements of NELAC, unless otherwise stated in writing, and relate only to these samples.
