2.20 miles to Dollar General in Wooster
- Information:** The owner completed construction of this RV Park in March 2024. He spared no expense in the details. The pvc sewer connections are in concrete. There is a water shut off valve at every RV site, (one site can be under repair and the remainder of the RV sites will still have running water). The electrical connection towers include individual meters. If you elect to pay up to a certain monthly dollar amount, the renter pays the electrical costs above your included electrical usage. The park has extremely fast fiberoptic WIFI with nodes, (boosters) throughout the park. Video motion security cameras in the park provide vivid photos of vehicles and/or people entering the park. The security camera footage is available on your cell phone and/or computer. This park offers ample free space in and around the RV sites for the renters to enjoy. According to "safewise.com" and "crimedata.io", Greenbrier is the safest town to live in Arkansas.
