If the answer to any of the items in Section 3 is yes, explain (attach additional sheets if necessary):

(Intermittent or Weather Springs) There are several springs on the property, with one of them pushing out approximately 8 gallons per minute when Lake Travis is up. It is currently dry but can come back at any time. We are currently in a drought, but when I purchased the property in 2018 the main spring flowed constantly and filled the pond. Any overflow is pushed towards the lake. The spring is not the same thing as the well.

(Encroachments) In some places on the property, the neighbor's fence encroaches on my property and mine on his. It's because the fence runs along a ravine. Follow the survey to see exactly where the property line is.

(Previous Other Structural Repairs) The utility room leaned but was repaired and reinforced with additional bracing. It is fine now.

(Settling) In one spot in the big yurt, there was some settling of one of the footings near the back of the big yurt. It is fine, though and is structurally sound.

*A single blockable main drain may cause a suction entrapment hazard for an individual.

Section 4. Are you (Seller) aware of any item, equipment, or system in or on the Property that is in need of repair, which has not been previously disclosed in this notice? yes no If yes, explain (attach additional sheets if necessary):

Section 5. Are you (Seller) aware of any of the following conditions?* (Mark Yes (Y) if you are aware and check wholly or partly as applicable. Mark No (N) if you are not aware.)

Y N

- Present flood insurance coverage.
- Previous flooding due to a failure or breach of a reservoir or a controlled or emergency release of water from a reservoir.
- Previous flooding due to a natural flood event.
- Previous water penetration into a structure on the Property due to a natural flood.

- Located wholly partly in a 100-year floodplain (Special Flood Hazard Area-Zone A, V, A99, AE, AO, AH, VE, or AR).
- Located wholly partly in a 500-year floodplain (Moderate Flood Hazard Area-Zone X (shaded)).
- Located wholly partly in a floodway.
- Located wholly partly in a flood pool.
- Located wholly partly in a reservoir.

If the answer to any of the above is yes, explain (attach additional sheets as necessary):

(Q2) The lower 3.6 acres of the property are in a 100 year flood zone with a Zone AE. In 2018, when there was a massive rain event across West and Central Texas, the Lower Colorado River Authority released water from the dams higher on the lake chain. As a result, Lake Travis rose quickly by 40 feet. As expected, water encroached on the lower part of the property in the zone indicated on the survey. It covered approximately 1.5 acres of the 3.6 acres considered in the 100-year flood zone. The high part of the property is not in the flood zone and is approximately 100 feet above the 3.6 acres mentioned.

(Q3) See above. The natural flood event was the result of the releasing of water from dams higher on the Colorado River because of several days of rain in 2018.

(Q5) 3.6 acres are considered "submerged" according to the LCRA. It is zoned AE, however in the 7 years I have owned the property, I have only seen water encroach onto approximately 1.5 acres. This is when we had a massive rain event in 2018 and the LCRA released water into Lake Travis. I have never seen the 3.6 acres submerged. I do have a wet weather creek that flows during heavy rainfalls.

****If Buyer is concerned about these matters, Buyer may consult Information About Flood Hazards (TXR 1414).***

"500-year floodplain" means any area of land that: (A) is identified on the flood insurance rate map as a moderate flood hazard area, which is designated on the map as Zone X (shaded); and (B) has a two-tenths of one percent annual chance of flooding, which is considered to be a moderate risk of flooding.
